PROJECTS

BECOME A SUPER SAIYAN

<http://super-saiyan.surge.sh>

March 2018

Tech Used: Ember.js, Node.js, Express.js, Knex.js, Chart.js, Cypress, surge, and CSS.

For the Dragonball Z lovers of the world. Create your own profile paired with your trainer of choice, and start learning saiyen skills. Want to learn a specific skill? Add your own!

BEERHOLIC POKEMON

beerholic-pokemon.herokuapp.com

February 2018

Tech Used: Ember.js, Heroku, Cypress, Bootstrap, and CSS.

For Pokemon and beer lovers comes an app that provides you your favorite pokemon with their favorite beer, showcasing beer description and location.

High Lonsome 100 RMS

highlonsome100runnertracking.firebaseio.com March 2018

Tech Used: Vue.js, Twilio, Node.js, Express.js, PostgreSQL, Knex.js, MySQL, Heroku, and Cypress.

A mobile app that is created to add and update runners as they pass through aid stations during their 100 mile race. Updates time in and out of each station and whether the runner had a pacer with them.

EDUCATION

BACHELOR OF SCIENCE

University of Colorado at Colorado Springs, 2015

WEB DEVELOPMENT IMMERSIVE

Galvanize, 2018

A 6 month in person, full stack web development immersive program, giving over a 1000 hours of industry focused coursework. I worked in unfamiliar environments to learn Javascript, pair programming, agile, frontend frameworks, and much more.
